For All Toy Digital Camera Lovers

CAMERAtan

TOY DIGITAL CAMERA

What is CAMERAtan?

* Your iPhone becomes a digital toy camera!

CAMERAtan is a digital toy camera that transforms your iPhone camera into a fun camera app. Capture extraordinary shots of your everyday life!

* 32 fun effects!

We have constantly updated CAMERAtan since its release on September 2009. Version 1.9 contains 32 effects! It anticipates all your wishes!

* Great introductory digital toy camera!

Dependent on its creator, each digital toy camera has its own character and result. This makes it hard to choose an app to purchase. CAMERAtan is cheaper than actual digital toy cameras. Everyone can enjoy it easily!

Basic operations

The new CAMERAtan contains some important icons and buttons. Here are some of its basic operations.

①

②

① Photo Albums

Tapping this icon opens the Photo Albums. Select this function when you wish to choose pictures you've already taken.

② Camera

Tapping this icon launches the Camera. Select this functions to take a new picture.

③ Save

Tap the save icon to save your favorite pictures.

④ Undo Processing

Tapping this button to cancel the effect.

⑤ Add Processing

Tapping this button to add effects.

③

CAMERAtan effect catalog

The next 5 pages show you 28 effects out of a total of 32 effects (except multi-exposure effects) in CAMERAtan ver.1.9. Please see the page 9 for the multi-exposure effects. Find your favorite effects.

About multi-exposure

CAMERA also allows you to use multi-exposure. You may find it slightly difficult to process but once you get used to, it is very easy. Try it now!

① Select Normal

Select the first picture. When the effect selection screen appears, select the "Normal" button outlined in blue on the enlarged picture above.

② Select the second picture

The unprocessed picture is output now. Select the second picture which goes over on the first picture from the Photo Albums or Camera (you can also take a picture).

③ Completed!

The effect selection screen will be displayed again. In order to complete the effect, select one of the three icons outlined in red on the enlarged picture above.
